

An LSC-ESF funded Regional BI-T Alliance Project is working with 30 trainers from 18 providers in the region.

spected standard will set him apart from the rest. Companies such as PDS Engineering stressed that they feel more confident in the trainers abilities and are more likely to let them come into their company.

'The Business Improvement Techniques NVQ is seen as a driver for positive change in an organisation and, more importantly, leaves a sustainable legacy. Seeing employees energised as they work towards shared goals is very rewarding for me as a trainer.'

Allan Chettoe Trainer and Assessor Stegta

Allan has been delivering BIT Training into Adelaide Engineering since April 2007. Since then they have seen huge improvements below is a picture of Adelaide Engineering before and after BIT Training.

Allan Chettoe above is a BIT trainer and assessor working for Salford & Trafford Engineering Group Training Association (STEGTA). Allan took advantage of LSC-ESF funding through Automotive North West to train towards National Skills Academy for Manufacturing trainer standards. The training he received was delivered by Industry Forum and, although very intensive, it has provided him with additional knowledge and skills to deliver BIT across a broad spectrum of sectors. The BIT Training for the assessors included Statutory Regulations and Safety, Effective Team Working, Problem Solving, and Creating Visual Management techniques to name just a few. 'STEGTA has been training apprentices and adults in engineering for over 40 years, and have just received outstanding grades from Ofsted. BIT was a natural addition to the portfolio and is being actively promoted by us as we see the benefit of continuous improvement to the employers we work with' says Allan.

Allan Chettoe believed he is now able to deliver BIT in the northwest to a higher standard than before. He believes there are a lot of trainers who are not up to scratch, so reaching a re-

The picture taken after the BIT training is a lot less cluttered. The tools have been organised and the space is better utilised. Adelaide have been delighted with the effect BIT Training has had on their company and their employees. They have reported increased productivity, and confidence in their procedures. They built up a good relationship with Allan and would recommend the training to other employers.
